2. Accessibility

Maryland provides an accessible ballot-marking device at **all early voting centers and Election Day polling places**. Blind and low-vision voters can use a **headset and keypad to listen to the ballot and make their selections**. The equipment also provides **high-contrast and large-print functions**.

You do not have to explain or justify why you want to use the accessible voting equipment.

Ask the election judge!

3. Ask for Help?

Maryland voters with disabilities may receive assistance when voting.

A voter can generally choose someone to assist them, but that person **cannot be the voter's employer or employer's agent, a union officer/agent, or a challenger or watcher.**

Alternatively, the voter may ask for assistance from election judges.

4. Accessible Voting From Home

Maryland offers an **online accessible ballot-marking tool** for voters with disabilities who cannot independently mark a conventional paper ballot. A voter who requests electronic ballot delivery can access the online ballot delivery system, make selections using the accessible marking tool, and print the completed ballot.

Maryland does not allow electronic return of the voted ballot.

After using the accessible online tool, the voter must **print the voted ballot** and return it by mail, ballot drop box, or in person. A ballot returned by email or fax will not count.

For 2026, the deadline to request a Print-at-Home ballot for the General Election is **Friday, October 30.**
