

"Marvelous Migrations: The Amazing Journeys of Maryland's Birds"

Thursday, November 5th at 11am
Auditorium

Weighing only as much as a penny, Ruby-throated Hummingbirds fly 500 miles to cross the Gulf of Mexico, warblers can fly 80 hours nonstop, and the 'moonbird' has flown a distance equivalent to flying to the moon. Learn about these astonishing feats of flight and what we can do to make migrants' travels safe."

The Nature Committee will welcome Rob Mardiney of the Irvine Nature Center, where he served as Director of Education until his retirement.
